THE BEST EDITION OF MUNDINUS' ANATOMIA.

(MUNDINUS).-- Curtius, M. IN MUNDINI ANATOMEN EXPLICATIO. 4 leaves, 400 pp.
With printer's device. 8vo. Half vellum. PAVIA, Fr. Moschenus
and G.B. Niger, 1 6 5 0.

First edition of this commentary. Swiss Francs 200.- less 10% discount.

"THE WORK OF MONDINO IS A LANDMARK IN THE HISTORY OF ANATOMY. It is the first modern book on the subject".

"Pavia, 1550. Text with commentary of Matthaeus Curtius. Very valuable for the care and skill with which the text has been prepared. From the point of view of textual study THE BEST EDITIONS are probably those of Bologna of 1521 and PAVIA, 1550" (Singer, Fasc. p. 56).

Matthaeus Corti (about 1526-74?), was physician at the Universities of Padua, Bologna, Florence, and Pisa. At the end of the commentary there is added a treatise by Curtius: De musculis, earumque partibus, motibus ac dissectione, compendium.

The very few editions of Mundinus' Anatomia published before the present edition of 1550 are without exception of greatest rarity and therefore quoted at very high prices. The 1550-edition contains the complete text of Mundinus' work with the commentary by Curtius.- Fine copy of this standard work.

THE FIRST EDITION OF BAUHINUS' FINEST ANATOMICAL WORK.

BAUHIN, Gaspar. THEATRUM ANATOMICUM. 8 leaves, 1314 pp., 23 leaves.
With very fine frontispiece, beautiful portrait of Bauhinus,
and 131 EXCELLENT ANATOMICAL FULLPAGE PLATES.
Stout, large 8vo. Old vellum. Frankfurt, 1605.

Swiss Francs 190.- less 10% discount.

Choulant-Frank p. 229. De Lint, Atlas p. 51. Feyfer, D, nr. 6.

Roth 287. Turner 1178, 124.

FIRST EDITION OF THE MOST BEAUTIFULLY ILLUSTRATED WORK.

"Bauhinus produced an excellent and scholarly text book of anatomy and introduced several anatomic terms which have remained in use. Among them are areola, and phrenic nerve. He described and figured the ileo-caecal valve to which, however, Falloppio had drawn attention" (De Lint).

"The Theatrum contains reduced copies from VESALIUS, VALVERDE, EUSTACHI, COITER, and other anatomists. The merit of Bauhin's work consists in the compiling and revising of subject matter already known. He did this in a scholarly fashion and with expert knowledge, and was thus able to produce a work that was both welcome and useful to his time" (Choul. Frank). The work also is very remarkable on account of the great number of valuable, anatomic copperplates.

IN VERY FINE CONDITION, especially the PLATES IN FINEST IMPRESSIONS.

Copies of this work have been offered recently for Swiss Francs 275.- and more.
